

CompTIA RFID+

Get the Most from Your RFID Applications

RF applications can save time and money, but only when the technology is implemented and maintained properly. If you're thinking about integrating RF technologies into your business process, you'll need qualified people to ensure your applications are effective. CompTIA RFID+ is the certification that guarantees your employees have the foundation-level skills and knowledge to install, maintain, repair and troubleshoot the overall functionality of RFID products

CompTIA RFID+ was created with the support of industry-leading companies and field experts. Alien Technologies, AIM, Brilljent, DHL, IBM, Intermec, Indiana and Purdue universities, ODIN technologies, OTA Training, RFID4U, RFID Global Solutions, RFID Journal, ScanSource, Symbol, Texas Instruments and Zebra are just some of the organizations that participated in the development of CompTIA RFID+.

Why certify my employees?

CompTIA RFID+ certification proves an individual has the necessary foundation-level RFID knowledge and skills. Employers benefit from simplified hiring, training and professional development for employees, and greater efficiency organization-wide. In addition, employing certified technicians demonstrates professionalism to customers, creating new business opportunities.

Who employs CompTIA RFID+ certified professionals?

Companies that employ CompTIA RFID+ certified individuals include Accenture, Boeing, Blockbuster, Bridgestone/Firestone, DHL, Intel, International Paper, Kohler, Motorola, ODIN Technologies, Pactiv Corporation, Siemens, Target, Tyco, Unisys, U.S. Department of Aviation, U.S. Department of Homeland Security and the U.S. Marines.

“As DHL takes a leading role in the standardization of RFID technologies, professional development opportunities and certification within the field continue to become increasingly important for our staff. CompTIA RFID+ certification supports DHL's role in deploying RFID technologies that can help our customers realize greater efficiencies and benefits for their shipping and supply chain management processes.”

Bob Berg, Head of Global Technology Planning and Innovation, DHL
